

### **a p300 based brain pdf**

The P300 (P3) wave is an event related potential (ERP) component elicited in the process of decision making. It is considered to be an endogenous potential, as its occurrence links not to the physical attributes of a stimulus, but to a person's reaction to it. More specifically, the P300 is thought to reflect processes involved in stimulus evaluation or categorization.

### **P300 (neuroscience) - Wikipedia**

Histone acetyltransferase p300 also known as p300 HAT or E1A-associated protein p300 (where E1A = adenovirus early region 1A) also known as EP300 or p300 is an enzyme that, in humans, is encoded by the EP300 gene. It functions as histone acetyltransferase that regulates transcription of genes via chromatin remodeling. This enzyme plays an essential role in regulating cell growth and division ...

La onda P300 (EP300, P3) es un potencial evocado que puede ser registrado mediante electroencefalografía como una deflexión positiva de voltaje con una latencia de unos 300 ms en el EEG. La presencia, magnitud, topografía y duración de esta se utiliza a veces en la medición de la función cognitiva de los procesos de toma de decisiones. . Mientras los correlatos neuronales de este ...
