7. STUDY OUTLINE - 1. Introduction 2. Matter 3. Elements 4. Laws & Theories 5. Combinations of Elements  
Study these topics then write a paper in your own words on each one to document your studies and findings.  
Include graphs and diagrams when necessary to aid in the explanation of the topics.

In physics, the Coriolis force is an inertial or fictitious force that seems to act on objects that are in motion within a frame of reference that rotates with respect to an inertial frame. In a reference frame with clockwise rotation, the force acts to the left of the motion of the object. In one with anticlockwise (or counterclockwise) rotation, the force acts to the right.

## **Coriolis force - Wikipedia**

Here is a set of notes used by Paul Dawkins to teach his Differential Equations course at Lamar University. Included are most of the standard topics in 1st and 2nd order differential equations, Laplace transforms, systems of differential equations, series solutions as well as a brief introduction to boundary value problems, Fourier series and partial differential equations.
