How HV transmission lines affects humans and plants?

"Transmission tower" is the name for the structure used in the industry in the United States, and some other English-speaking countries. The term "pylon" comes from the basic shape of the structure, an obelisk-like structure which tapers toward the top, and the name is mostly used in the United Kingdom and parts of Europe in everyday colloquial speech.

A single-wire transmission line (or single wire method) is a method of transmitting electrical power or signals using only a single electrical conductor. This is in contrast to the usual use of a pair of wires providing a complete circuit, or an electrical cable likewise containing (at least) two conductors for that purpose.. The single-wire transmission line is not the same as the single-wire ...

In this two-part Bench to Clinic narrative, recent advances in both the preclinical and clinical aspects of artificial pancreas (AP) development are described. In the preceding Bench narrative, Kudva and colleagues provide an in-depth understanding of the modified glucoregulatory physiology of type 1 diabetes that will help refine future AP algorithms.

Artificial antigen presenting cell system. Antigen-presenting cells (APCs) act as a link between the innate and adaptive immune responses.[] Upon internalization of an antigen, the APCs can display antigen-class I and II major histocompatibility complex (MHC) on the membrane together with co-stimulatory signals to activate antigen-specific T cells, which play a key role in the adaptive immune ...

I have wonderful news to share with you today. I am extremely proud to announce that the FDA has just approved our groundbreaking MiniMed 670G system â€“ the first hybrid closed loop system in the world! This approval is a significant milestone in the history of diabetes management, and a culmination of many years of dedicated work.
