Parenting or child rearing is the process of promoting and supporting the physical, emotional, social, and intellectual development of a child from infancy to adulthood. Parenting refers to the intricacies of raising a child and not exclusively to the biological relationship. The most common caretaker in parenting is the biological parent(s) of the child in question, although others may be an ...

Because noncognitive qualities like grit, curiosity, self-control, optimism, and conscientiousness are often described, with some accuracy, as skills, educators eager to develop these qualities in their students quite naturally tend to treat them like the skills that we already know how to teach: reading, calculating, analyzing, and so on. And as the value of noncognitive skills has become ...
