Your friends and colleagues are talking about something called "Bayes' Theorem" or "Bayes' Rule", or something called Bayesian reasoning. They sound really enthusiastic about it, too, so you google and find a webpage about Bayes' Theorem and...

Introduction. Naive Bayes is a simple technique for constructing classifiers: models that assign class labels to problem instances, represented as vectors of feature values, where the class labels are drawn from some finite set. There is not a single algorithm for training such classifiers, but a family of algorithms based on a common principle: all naive Bayes classifiers assume that the ...

Another great course! The initial Perceptron lectures were a little confusing for someone who had never heard about them before. But after watching a YouTube video by Bert Huang from V. Tech on Perceptrons everything made a lot more sense.

The Monty Hall problem is a brain teaser, in the form of a probability puzzle, loosely based on the American television game show Let's Make a Deal and named after its original host, Monty Hall. The problem was originally posed (and solved) in a letter by Steve Selvin to the American Statistician in 1975 (Selvin 1975a), (Selvin 1975b). It became famous as a question from a reader's letter quoted ...

The backpropagation algorithm is the classical feed-forward artificial neural network. It is the technique still used to train large deep learning networks. In this tutorial, you will discover how to implement the backpropagation algorithm from scratch with Python. After completing this tutorial ...

Python is one of the fastest-growing platforms for applied machine learning. In this mini-course, you will discover how you can get started, build accurate models and confidently complete predictive modeling machine learning projects using Python in 14 days. This is a big and important post. You ...

This book, along with Think Stats: Exploratory Data Analysis, Think Bayes: Bayesian Statistics in Python, and Bayes' Rule: A Tutorial Introduction to Bayesian Analysis, improved my understanding for the motivations, applications, and challenges in Bayesian statistics and probabilistic programming. For reference, my background is in computer science, viewed mostly from a software engineering ...
