A Bachelor of Science in Biomedical Engineering is a kind of bachelor's degree typically conferred after a four year undergraduate course of study in biomedical engineering (BME). The degree itself is largely equivalent to a bachelor of science and many institutions conferring degrees in the fields of biomedical engineering and bioengineering do not append the field to the degree itself.

About Parks College. It might be the satellite we launch that leads to more efficient spacecraft, the robotic

device we develop that makes surgery less invasive, the infrastructure we design to provide clean water or the next-generation of pilots we educate to lead the future of aviation.

2.1. Capacitive tactile sensors. A capacitive sensor consists of two conductive plates with a dielectric material sandwiched between them. For parallel plate capacitors, capacitance can be expressed as, $C = \frac{\epsilon_0 \epsilon_r A}{d}$. Where C is the capacitance, A is the overlapping area of the two plates, ϵ_0 is the permittivity of free space, ϵ_r is the relative permittivity of the dielectric material ...
