Manufacturing Engineering The success of any design ultimately lies in the quality and functionality of the end product. Our standard design process here at PDE employs a concurrent engineering methodology utilizing task teaming with manufacturing to develop detail design & tool design in parallel.

In computer science, heapsort is a comparison-based sorting algorithm.Heapsort can be thought of as an improved selection sort: like that algorithm, it divides its input into a sorted and an unsorted region, and it iteratively shrinks the unsorted region by extracting the largest element and moving that to the sorted region.The improvement consists of the use of a heap data structure rather ...

The purpose of interleaved multithreading is to remove all data dependency stalls from the execution pipeline.Since one thread is relatively independent from other threads, there is less chance of one instruction in one pipelining stage needing an output from an older instruction in the pipeline.
