declarative agent languages and pdf
As discussed at the start of this chapter, the most fundamental part of a Pipeline is the "step".Basically, steps tell Jenkins what to do and serve as the basic building block for both Declarative and Scripted Pipeline syntax.

Pipeline Syntax
A constraint programming language is a declarative programming language where relationships between variables are expressed as constraints.Execution proceeds by attempting to find values for the variables which satisfy all declared constraints. Command line interface languages. Command-line interface (CLI) languages are also called batch languages or job control languages.

List of programming languages by type - Wikipedia
Overview. Philosopher of language, Peter Strawson advocated the use of the term "statement" in sense (b) in preference to proposition.Strawson used the term "Statement" to make the point that two declarative sentences can make the same statement if they say the same thing in different ways.

Statement (logic) - Wikipedia
Given by ACM SIGPLAN to recognize an individual or individuals who has made a significant and lasting contribution to the field of programming languages.
