SIAM Presents â€¦ Features Lectures from our Archives Since 2008 SIAM has been capturing many Invited Lectures, Prize Lectures, and selected Minisymposia from our conference.

### **SIAM: Archives and Future Meetings**

Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous. In contrast to real numbers that have the property of varying "smoothly", the objects studied in discrete mathematics â€" such as integers, graphs, and statements in logic â€" do not vary smoothly in this way, but have distinct, separated values.

Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

Numerical analysis is the study of algorithms that use numerical approximation (as opposed to general symbolic manipulations) for the problems of mathematical analysis (as distinguished from discrete mathematics). Numerical analysis naturally finds application in all fields of engineering and the physical sciences, but in the 21st century also the life sciences, social sciences, medicine ...

The use of discrete fracture networks for modelling coupled geomechanical and hydrological behaviour of fractured rocks

### **The use of discrete fracture networks for modelling**

Abstract: Let  $g$  be a smooth expanding map of degree  $D$  which maps a circle to itself, where  $D$  is a natural number greater than 1. It is known that the Lyapunov exponent of  $g$  with respect to the unique invariant measure that is ...

1.. Introduction Predictive modeling of species geographic distributions based on the environmental conditions of sites of known occurrence constitutes an important technique in analytical biology, with applications in conservation and reserve planning, ecology, evolution, epidemiology, invasive-species management and other fields Corsi et al., 1999, Peterson and Shaw, 2003, Peterson et al ...

### **Maximum entropy modeling of species geographic**

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with

the mere determination of the optimal solution.
