film and video editing pdf

Film editing is both a creative and a technical part of the post-production process of filmmaking. The term is derived from the traditional process of working with film which increasingly involves the use of digital technology.. The film editor works with the raw footage, selecting shots and combines them into sequences which create a finished motion picture.

Film editing - Wikipedia

Video editing software is an application program which handles the post-production video editing of digital video sequences on a computer non-linear editing system (NLE). It has replaced traditional flatbed celluloid film editing tools and analogue video tape-to-tape online editing machines.. NLE software is typically based on a timeline interface paradigm where sections of moving image video ...

Video editing software - Wikipedia

Video-editing software doesn't have to be costly. Plenty of options exist for both Windows 10 and MacOS that won't cost you an arm, a leg, or anything else -- and will let you edit video with ease.
