

physics friction problems and pdf

Friction Forces When two surfaces are in contact, friction forces oppose relative motion or impending motion. P Friction forces are parallel to the surfaces in contact and oppose motion or impending motion. Static Friction: No relative motion. Kinetic Friction: Relative motion.

There are two important things to remember in friction homework problems. The first is the normal force N is always perpendicular to the surface. The normal force is not always \hat{y} . The second is the friction force works opposite in direction to the motion of the block. Friction is a resistive force.

AP Physics " Friction Friction! You've heard that word, heck, maybe you've even used it. So what in the world is ... Let's do a simple friction problem. 82 A 25.0 N wood block is pulled across a wooden table at constant speed. What is the force needed to do this? For the coefficient of kinetic friction use 0.35.
