Making Sense of the Numbers: Statistics for Food Scientists

Don't be baffled by statistics! In the food business, there is the product development cycle no one ever wants to ride: poorly conceived experiments which produce bad data that leads to wrong conclusions and, finally, to market failure.

Statistics for Food Scientists | Food Engineering

Non-parametric statistics in Food Science. Non-parametric procedures use ranked data rather than actual data values. The data are ranked from the lowest to the highest and each value is assigned, in order, the integer values from 1 to n (where n = total sample size) (Hollander & Wolfe, 1973).
