In mathematics, a fractal is a detailed, recursive, and infinitely self-similar mathematical set whose Hausdorff dimension strictly exceeds its topological dimension. Fractals are encountered ubiquitously in nature due to their tendency to appear nearly the same at different levels, as is illustrated here in the successively small magnifications of the Mandelbrot set.

Definition. Formally, an iterated function system is a finite set of contraction mappings on a complete metric space. Symbolically, $\{f_1, f_2, \dots, f_n\}$ is an iterated function system if each f_i is a contraction on the complete metric space X . Properties

Note! This is an introductory article covering the most basic principles of the Fractal Holographic Universe theory. For a more in depth understanding of the physics involved, please read Quantum Gravity and the Holographic Mass Nassim Hameiri's life long investigation into the geometry of space has led to his publication of several scientific papers in which he presents a new solution

Hameiri's latest scientific paper "Quantum Gravity and the Holographic Mass" presents a brilliant approach to Quantum Gravity and the Holographic principle as the origin of mass and matter in our universe. The paper reveals a fundamental symbiotic relationship between the proton and the larger universe in which it resides, and it draws a picture of our universe as a boundlessly ...

a Strange Attractor? David Ruelle 764 NOTICES OF THE AMS VOLUME 53, NUMBER 7 Your computer will readily implement the map f sending the point $(u,v) \in \mathbb{R}^2$ to the point $(v + 1 - au^2, bu) \in \mathbb{R}^2$, where $a = 1.4$ and $b = 0.3$. Ask your computer to plot the points $x_n = f^n(0,0)$, and you will find that they accumulate, for $n \rightarrow \infty$, on a convoluted fractal set A known as the HÃ©non ...

If a someone is to help you understand FRACTAL FIELDS- centripetal life force and biologic rejuvenation (commercial proof it works: theraphi.net)- you will definitely need a scientist who knows why an object falls to the ground (thus excluding Einstein and Stephen Hawkins). Gravity is a centripetal electrical force.

Coronary bifurcations are frequent and account for approximately 20% of all percutaneous coronary interventions. Nonetheless, they remain one of the most challenging lesion subsets in interventional cardiology in terms of a lower procedural success rate and increased rates of long-term adverse cardiac events.
