Femininity (also called girlishness, womanliness or womanhood) is a set of attributes, behaviors, and roles generally associated with girls and women. Femininity is partially socially constructed, being made up of both socially-defined and biologically-created factors. This makes it distinct from the definition of the biological female sex, as both males and females can exhibit feminine traits.

Love magic is celebrating one's love for the self, and being the love that is wanted from another. Romantic love requests an equal partner to enjoy sex. It can be implemented in a variety of ways, such as written spells, dolls, charms, amulets, potions, or different rituals. Love magic has been a branch of magical practice, and a topos in literature and art, for many centuries.
